7 The editors of *OBM Transplantation* would like to express their sincere gratitude to the
8 following reviewers for assessing manuscripts in 2022. We greatly appreciate the contribution
9 of expert reviewers, which is crucial to the journal's editorial process. We aim to recognize
10 reviewer contributions through several mechanisms, of which the annual publication of
11 reviewer names is one. Reviewers receive a voucher entitling them to a discount on their next
12 LIDSEN publication and can download a certificate of recognition directly from our submission
13 system. Additionally, reviewers can sign up to the service Publons (<https://publons.com>) to
14 receive recognition. Of course, in these initiatives we are careful not to compromise reviewer
15 confidentiality. Many reviewers see their work as a voluntary and often unseen part of their
16 role as researchers. We are grateful to the time reviewers donate to our journals and the
17 contribution they make.
